Attic Ladder Safety Railing

Building codes require safety railings on stairways and landings in the home. However, the attic ladder landing has been ignored and left unprotected by home builders and code inspectors for years.

The new **Versa Rail** provides a simple, low-cost solution to this safety problem and installs in minutes with ordinary tools!

Problem: Entering or exiting the attic from an attic ladder is very dangerous without a hand-rail... **and** the ladder opening is a falling hazard while you work in the attic!

Easy Solution: The **Versa Rail** dual grab rails provide comfort and security when you are entering or exiting the attic... **and** it surrounds the ladder opening for safety!
